my picture in my next letter if I	<b>can</b>	I Wish you would try an have some
have a picture taken from yours if I	<b>can</b>	I am goeing to have a large one
make Mary and yourself as happy as you	<b>can</b>	I am sending the order in this letter
that she will write to me when she	<b>can</b>	I am very glad to hear you will
you are trying to do the best you	<b>can</b>	I think of you so often I hope
take very good care of yourself if you	<b>can</b>	I hope the girls are all well and
you are trying to do the best you	<b>can</b>	I did not write to you at the
you must try and Keep well if you	<b>can</b>	I Know you never can stop thinking of

with her she told me to day she	<b>does</b>	be in Ireland every night in her dreams
I do have good fun with them Alice	<b>does</b>	be saying my dear Auntie she calls Annie
very well this winter and if your Cough	<b>does</b>	be as bad as usual and are you
have them all through the year the alter	<b>does</b>	be lovely today and Easter Sunday also evryone
cannot very come out in winter the roads	<b>does</b>	be so bad her two girls Jennie and
about [OBreens?] marriage what happens in Ireland today	<b>does</b>	be on the papers tomorrow. It [says?] the

# Thinking about the data

- What data do we have?
- How can we analyse that data?
- What kinds of questions do we want to be able to answer? – How should we *model* that data?

# Thinking about the visualization

- What are we trying to do with the visualization?
  - Explore
  - Comprehend (analyze)
  - Communicate (present)
- How should we visualize the data and its analyses?

# Data: Lough Letters

- 99 Letters, from 6 authors (4 sisters), plus "Unknown"
- Taken as transcribed
- Additional automatic analysis
  - Lemmas, part of speech tags using TreeTagger
  - Phrases in common using my own program
  - "Topics" using Mallet

Sources: Moreton 2012,

TreeTagger: <http://www.cis.uni-muenchen.de/~schmid/tools/TreeTagger/>

Mallet: <http://mallet.cs.umass.edu/>

LOUGH\_046\_Unknown\_29JanXXXX.txt  
Winsted Conn January 29 [1913?] My Dearest  
Mother I was very glad to hear from you so soon but sorry indeed to hear you are not well. It must be very hard on you to cough so much. You often sat in bed [cofph?] for an hour when I was home but of course it is harder on you know that you are older Spring is always the hardest I hope in God you will feel better soon you know young and old rich and poor every one gets their own turn sooner or later and we must try and be content. I am glad to hear Mary John and baby is well. We are all well here at present Thank God Dear Mother this has been the coldest Winter here in twenty years not so very much snow as yet but the cold is intense. I shall be very glad when Spring is here it is pretty hard to get out such cold mornings [Nouncie?] is very well she has been to Nora s that is Johns sister She has got a son you remember I was her bridesmaid I should thing (sic) you would try and keep the door shut on that baby [houce?] and not let her freeze up. I tell you there is no doors open here I am surprised to think she is not waking. I do wonder if she looks like me. I would love dearly to have her picture and her papa Tell Mary I will write her a long letter soon I did not think she was in any particular hurry it takes her so long to write some times. I do not have very much time only Sundays and then I sleep in the morning and go to church twice I expect to be home for a few weeks next month before the Spring season opens so I will have time to think I am the only girl is working and [ Hauley?] my friend since Xmas but she
